

Saint-Gobain Ecophon

Module 8: Psychoacoustics in the workplace

Content:

Research has shown that different personality types within the workforce are best supported by different acoustic conditions. In this CPD we explore the impact that a psychoacoustic approach can bring to a successful office design. The CPD covers:

- Sensory and Biophilic design principles
- What is psychoacoustics, an evidence based approach
- Noise's effect on performance
- Tasks and personality
- Activity based acoustic design

If you would like to learn more about the subjects covered in the presentations, or to make a booking, please contact our Architectural Advisor team on +44 (0) 1256 855280

- Module 1: Ceiling design and room acoustics
- Module 2: Acoustics in education
- Module 3: Acoustics for SEN teaching
- Module 4: Acoustics for further and higher education
- Module 5: The impact of acoustics on care and recovery
- Module 6: Designing for dementia and elderly care
- Module 7: Acoustic Design of the Modern Office
- Module 8: Psychoacoustics in the workplace**
- Module 9: Acoustics in retail and leisure
- Module 10: Acoustics in clean industry / high care environments
- Module 11: Acoustic design for international projects
